

ALEX. TARBET RETURNS

Tells About His Trip to California.

WILL TAKE UP A BOND

LIVELY DEVELOPMENT ON AFTER THOUGHT.

Consideration of \$150,000 Is to Be Paid For the Property, After Which Extensive Improvements Will Be Made—Another Grand Central Suit In Prospect.

Alexander B. Tarbet returned yesterday from an inspection trip to the After Thought mine in Shasta county, Cal., which recently came into possession of the Tarbet syndicate for a consideration of \$150,000.

Mr. Tarbet and his associates took over the development of the property last week by the heirs of Timothy Kelly, who owned the property and under the direction of William McDermott and A. J. Schumacher, a vigorous campaign of development has been in progress since that date.

A force of twenty men has been employed there, the purpose of Mr. Tarbet being to make the best possible showing of the property and to determine whether the developments will justify the expenditure of the second \$150,000.

So far as the work has progressed, Mr. Tarbet says everything appears to be satisfactory, and there is not much doubt that the bond on the mine will be taken up and plans laid for some extensive development work, to be followed by the erection of a large shaft to extract the values from the ore.

The syndicate working the After Thought enterprise have followed the plan of making the best possible showing in the ground by active development before making any more payment on the purchase price, believing it to be the best way to get the property before taking any great chances on the future.

Mr. Tarbet was accompanied home by Mr. Schumacher, who has been at the mine for over a month.

GRAND CENTRAL SUIT.

Heirs of Timothy Kelly to Be the Plaintiffs.

It was asserted yesterday that the Grand Central Mining company will be named as a defendant in a suit to be filed in the district court at Nepheli, which was brought by the heirs of Timothy Kelly, deceased, who was at one time the owner of a certain part of the territory claimed by the Grand Central company.

The attorneys representing plaintiffs were questioned concerning the suit yesterday, but they declined to give out any information concerning it.

It is believed the question of title will be the grounds for bringing the suit.

NEW MINING COMPANY.

Articles of Incorporation For Trinidad Filed.

Articles of incorporation for the Trinidad Mining company were filed yesterday. The capital stock is \$50,000, divided into 1,000 shares of the par value of \$50 each. The company is to be organized by W. L. Sierbeck, treasurer, and E. H. Peirce, secretary. The other directors are W. L. Sierbeck, George L. Savage and L. W. Snow. The company owns the Trinidad Nos. 1 to 8, and the Prince Nos. 1 to 5, in the Camp Floyd district, Tootie county.

AGGIE D. STRIKE.

Lon East Reports One In That State-Line Property.

Lon East, the well known Stakelaine operator, came up from Stakelaine yesterday, and reports that an important strike of gold ore has been made in the Aggie D., which is located about 200 yards from the Johnny mine, in which some extremely rich ore was encountered not long ago.

The ore was encountered in a drift on the 200-foot level of the mine. No tests have been made, but in judging the ore excellent results were obtained, and the colors were numerous enough to assure the owners that it is a valuable strike that is away up.

Mr. East states that the vein on the Aggie D. ground is between twenty-five and thirty feet in width.

ORE FROM LION HILL.

Encouraging Results From Northern Light Extension Ore.

Returns were received yesterday from two samples of ore taken from the tunnel of the Northern Light Extension mine, Lion Hill. They showed values of 1.125 ounces silver, \$2.40 gold, and 1.544 ounces silver \$2.40 gold respectively. At the present time the mine is showing about a foot of a good grade of ore, with the vein increasing in width as work progresses. The property is located about a mile and a half from the mine, and Mr. Hood placed an order to the Northern Light. It has, as the assays will indicate, very favorable indications.

THE YOUNG AMERICA.

Shaft Has Been Completed to the 200-foot Level.

Advices received from Tuscarora, Nev., yesterday announce an encouraging state of affairs in existence at the Young America mine.

The shaft has been completed to a depth of 200 feet, where a station has been put in. A pump is under construction, and a drift will be made to the 200 level.

Manager W. R. Andrew has been engaged for several days in fixing up details in connection with the erection of a new mill at the mine. Some immense work has been encountered, and the mine is being developed as great as the Dexter with further development.

RICHES OF IRON COUNTY.

Indication of Important Developments In That Section.

Iron county is rich in its deposits of minerals. It has its gold, its silver, its copper and within its environment it has apparently inexhaustible deposits of iron and coal.

Lake capital, likewise foreign capital, has been interested in the rich resources of the county. The Herald who have kept careful watch of its mining conditions, has been able to report on the progress of the county's development in the gold and silver camps of Stakelaine and Pike's Diggins, where during the past few months some all-time record discoveries of gold have been made.

The mine owned by De Lamar (Nev.) and Salt Lake people, has perhaps outdone all others in the camp, for the reason that the mine has reached the advanced stage of development.

A crowd of second-class ore is reached and the mine is being developed. The owners counted up the net proceeds they found it had given them returns of over \$400 to the ton. Another crowd of second-class ore is reached and the mine is being developed.

The local sampling works within a few days. The lot is made up principally from the first-class ores of the mine and from sources entirely authentic and reliable. It is believed this consignment will double and probably triple the average per ton received from the mine.

The Ophir, owned by Salt Lake and Calumet (Mich.) parties, has made wonderful progress during the past few months. The object of this mine are principally, in fact almost entirely, silver, but the values in them run high and some of the mine have recently showed over 300 ounces in the white metal.

fully from the first-class ores of the mine and from sources entirely authentic and reliable. It is believed this consignment will double and probably triple the average per ton received from the mine.

The Ophir, owned by Salt Lake and Calumet (Mich.) parties, has made wonderful progress during the past few months. The object of this mine are principally, in fact almost entirely, silver, but the values in them run high and some of the mine have recently showed over 300 ounces in the white metal.

The Deer Trail, in Pike's Diggins, owned entirely by Salt Lake and Bing men, shows every evidence of being rich in its gold values. No great depth has been attained as yet, but there is said to be more than 100 ounces of gold in the mine. The mine is owned by the Deer Trail, in Pike's Diggins, owned entirely by Salt Lake and Bing men, shows every evidence of being rich in its gold values.

There are several other gold properties in the latter camp that are of more than ordinary promise. They are the Monitor, the property of King, Burton & King and others, and the Wild Irish and Amethyst, recently purchased by Messrs. A. W. McKinnon and R. C. Lums, who are doing some great work in the Homebase and Homebase properties, just outside of the mine in Nevada.

While the attention has been directed to the gold and silver regions of Iron county, little has been said of the vast resources of the Pine district, and except in a quiet way, the coal measures in the vicinity of Cedar City have been entirely lost sight of.

There are abundant supplies of hematite iron ore of extremely high grade within the boundaries of the Pine district.

Colonel Miller recognized the importance of the district some time ago and visited the ground in company with R. R. Dear and Fred Lurch, prominent Iron county metallurgists. These gentlemen quietly and unassumingly gathered together a group of over thirty claims and during the last few months Robert R. Dear has been employed in doing the assessment work upon them.

A shaft has been sunk to a depth of 100 feet on the same line, and hematite iron ore of extremely high grade within the boundaries of the Pine district.

WEEK'S STOCK MARKET

Advances of the Week Were Made In Mammoth Stock. SALES AS HIGH AS \$2.87

NORTHERN LIGHT SUFFERED A DECIDED REVERSE.

Stock of Mercur Mine Maintained Its Strength—Sales For the Week Aggregated \$20,415 Shares, Selling at \$90.67-70—Yesterday's Closing Quotations.

The condition of mining stocks last week was not the best. In the early part of the week there was a feeling of depression and with few exceptions stocks were inclined to go lower.

Marked advances were made by Mammoth, which has been on a steady gain from the opening on Monday, when prices ranged around \$2.20 a share, while yesterday several sales were noted as high as \$2.87. Northern Light suffered declines, but later in the week the stock was in better tone and buyers were willing to pay better prices for it.

The Mercur stocks, with the exception of that of the Mercur mine, were in bad condition and appeared on the bearish side of the house. The Bowers stocks made no notable changes, while there was quite a demand for Yankee Consolidated at better prices.

Dexter ruled strong and was a favorite among the speculators. The recent development at the mine has strengthened confidence in the stock and, with the showing being made, it appears it will not be very long until the company will have all the indebtedness against the mine entirely liquidated. Daly-West was held up to good figures, while Valeo exhibited a decided weakness.

The sales of the week on the Salt Lake exchange were as follows:

Monday 30,150 715,525 50
Tuesday 33,300 1,063,500 50
Wednesday 14,725 478,250 50
Thursday 54,700 18,197 50
Friday 31,850 21,543 50
Saturday 20,625 9,023 25
Total 206,250 \$9,067 75

Yesterday's Transactions. The attraction during yesterday's call was Mammoth, which bounded up from \$2.25 at which price it was sold at the opening. Four Aces was stronger and sold at 22 cents, while Daly showed no gain over Friday's prices.

Sunbeam maintained its usual strength and Petro suffered a further attack from the bear crowd. Bunker Hill was weaker.

NATIONAL GUARD NOTES. The captains of the various organizations have been very busy all week in preparing their reports of target practice for Captain A. C. Larsen, regimental inspector of target practice; his reports must be in by the 10th inst.

Corporal Joseph H. Simpkins returned from his trip south Thursday evening.

Private Ellis Johnson celebrated his birthday to day with his company. Friday evening by colliding with an electric car while riding on a crowded street car. He sustained a broken nose.

First Lieutenant Lawrence W. Smeltzer has withdrawn from the race for the captaincy of A company, and will forward his resignation the coming week.

Private Frank Hanson of company C has forwarded an application for discharge, on account of physical disability by certificate of Dr. E. S. Wright.

Musicians Harvey Hardy, A company, leaves this morning for East canyon, on a three days' hunting trip.

Sergeant George Knudsen is able to be about once more, having nearly recovered from the wound on his head.

Application was received by C company from Frank Dubois.

Application for discharge was forwarded last week by E. J. Corbett from company C, as he goes to Idaho to reside.

The armory was decorated last week with relics of the triumphal arch, which were kindly presented to the guard by President Barnes of the city council.

Sergeant Allen G. Burt received his discharge from company C last Wednesday, by reason of his appointment as regimental sergeant major.

The discharge of First Sergeant Frederick K. Dust and Private John A. Hyde of company A have been discontinued.

Application from George E. Payne, formerly of company D, was forwarded to Captain M. Y. Cannon for a transfer to C company.

Drum Major Sophus H. Lund was on the sick list last week, with a sprained thumb.

Company drill was held last Monday night by company E. A company held equid drill on account of a poor attendance, owing to so many of its members working at night.

Quartermaster Sergeant Arthur C. Skidmore was busy all last week in remodeling the signal corps equipment room.

Private Charles Stansberry of company D has transferred to C company.

Captain J. A. Greenwald of the signal corps has decided to enforce military discipline, and some changes are being made at next Thursday night's drill.

Musicians Jacob H. Brox of company F has applied for a thirty days' furlough to visit Gold Mountain.

First Sergeant Henry F. Molenoff of the signal corps has returned to duty after a two weeks' sick leave.

First Lieutenant James T. Durand of company E, on leave for ten days, leaves of absence, visiting friends in Ogden.

Private Charles B. Hubler of A company has made application for his discharge, for the purpose of leaving this state to reside in Los Angeles. He leaves the coming week for that place.

The signal corps has discontinued helicopter practice for the season, and will take up photography in addition to flag signaling for the winter indoor drill.

The application of Edward K. Jordan for enlistment in the hospital corps has been discontinued.

Much interest was manifested by the guard in watching the hospital corps forward Monday night, which was held for the purpose of company drill. Stewards Knox Bodell and the corps through litter drill and carrying of wounded under fire.

Musicians John B. Sanderson of B company was excused from drill last Monday on account of recovering an injury to his arm, caused by getting his arm caught in a wheel.

Private Harry E. Vadnais of A company has applied for his discharge on account of leaving the state for his home in Massachusetts.

Regimental Adjutant Captain J. W. Alford will make application to be retired from the guard, having served over five years.

Chester A. Hope, formerly a member of battery A, has applied for membership in company A.

A Colloquy. (Deliberate Journal.) Drama turned directly upon Journalism. "With me" she answered, "it is still quality before quantity."

Particularly as to costumes," retorted Journalism, with quiet, illustrated humor. But it was as they quarreled what was to become of Art?
